

To our neighbors,

Since 1962, Lawn Funeral Home has prided itself on the relationships with the families and the communities in which we serve. We are carefully monitoring the COVID-19 pandemic and are referring to the latest guidelines from the Center of Disease Control (CDC), World Health Organization (WHO), governmental agencies and local health officials.

We have increased how often we clean and disinfect all areas of our buildings especially all high-touch areas. Also, we have been thoroughly cleaning our chapels, coffee rooms and arrangement offices after each use.

### **Funeral Services**

We are working with families on scheduling abbreviated visiting hours and encouraging immediate family funeral services with the option of a public memorial visitation or mass at a later date. We will help families make memorial tributes available online to view for people who cannot attend funeral services. Our funeral home is making it easier to offer condolences online through our website.

### **Attending a Visitation or Funeral Service**

Although a funeral ceremony is a time to show support and love to a family during a difficult time, we are asking to please refrain from hugging and shaking hands while paying your respects. Our restrooms and coffee rooms are available to wash hands prior to entering the chapel.

### **Coffee Room**

As we make it a top priority to sanitize and clean all areas throughout our facilities, we are asking families to limit any food being brought into our coffee rooms during this time. By restricting open containers or plates of food in our coffee rooms, it will help in the prevention of spreading protentional germs.

### **Pre-Planning/Pre-Arrangements**

Our funeral home staff will still be available to answer any questions in regard to preplanning. At this time, we will be handling all prearrangements over the phone and we will e-mail or mail any required documents to you.

As always, it remains our top priority to serve families in our community during their difficult time of loss of a loved one. To ensure we can continue to do so, we need to keep our families and employees healthy and available. By implementing some restrictions we are confident we will not need to delay funeral services and can work with each family to provide an important and meaningful memorial for your loved one.
